**Motor Business Asia-Pacific** Dundurn  
This book looks at the industrial policies of Southeast Asian economies in their motor vehicle industries from early import substitution to policy-making under the more liberalised WTO policy regime. The book examines how inward automotive investment, especially from Japan, has been affected by policies, and how such investment has promoted

industrial development in the late-industrialising economies within ASEAN (Association of Southeast Asian Nations). It provides insights into the automotive industry of Southeast Asia in terms of production volumes, sales volumes, market structure, and trade. Through country case studies, the book is a useful reference and illustrates how industrial policies in Southeast Asia have affected the spread of automotive development in the region. It will appeal to policy-makers and researchers interested in the automobile industry, industrial policies in the industry and the spread of development from foreign investors to local firms.

Russian businesses in the post-Soviet period have been noted for their unusual, sometimes allegedly corrupt, business practices, and for their role in the enrichment of oligarchs. This book, which includes a wide range of case study examples, and which draws on the author's first-hand experience of running a Russian company, argues that a key to understanding contemporary Russian business is the importance of arbitrage, that is the ability to take advantage of price and cost differentials in different markets. The book argues that the conditions for such arbitrage advantages are often created by businesses which have special links to particular

institutions; that arbitrage benefits are not available to all businesses in a sector, thereby providing unfair competitive advantages to some businesses; and that businesses' overall activities are often distorted by this system. The book includes an analysis of a wide range of different types of arbitrage activities in action.

The automobile industry is evolving rapidly on a worldwide basis. Manufacturers are merging, component design and manufacture are now frequently outsourced instead of being created in-house, brands are changing and the giant auto makers are expanding deeper into providing financial services to car buyers. The skyrocketing price of gas spurs developments in hybrid technology and clean diesel, as manufacturers look for ways to improve fuel efficiency. Meanwhile, all of the biggest, most successful firms have become totally global in nature. Plunkett's Automobile Industry Almanac will be your complete guide to this immense, fascinating industry. On the car dealership side, giant, nationwide holding companies have acquired the best dealers in major markets. Even the used car business is being taken over by national chains. E-commerce is having profound effects on the car industry. Consumers use the Internet to become better informed before making a purchase. Online sites like Autobytel steer millions of car buyers toward specific dealers while the same sites deliver competing bids for cars, insurance and financing in a manner that lowers costs and improves satisfaction among consumers. Meanwhile, auto makers are using the latest in e-commerce methods to

manage their supply chains and replenish their inventories. Franklin, Jack, Marla, Thadius, and Caitlin... this unlikely group of assorted misfits are the Cemeterians, a group that will take on any job - no, really, we mean any bloody job (money's a bit tight right now)! Trudge through disgusting sewers to battle manatee-massacring mermaids

and soggy cultists, creep through creepy, fog-littered cemeteries straight out of an ancient Hammer Film soundstage, confront undead lecherous lodgers and other assorted beasties, creepies, and ghoulies. It all comes down to whether an adolescent giant Automaton, a truly mad, Mad Scientist, a surly Necromancer, a Banshee's granddaughter, and a reluctant furry monster straight from under your little sister's bed can manage not to kill each other - or, at least, quit fighting over the tele-privilege-schedule long enough to get the job done! Not likely.

Corporate Strategy in Post-Communist Russia Dundurn

The last decade has seen Japan become more aggressive in settling its trade disputes through the WTO process whereas previously it preferred settling such disputes more informally on a bilateral basis. In *The Politics of WTO Dispute Settlement*, Keisuke Iida demonstrates how and why this transformation has taken place. Professor Iida argues that though Japanese trade policy has become "legalized" it remains distinct from US or the EU where trade lawyers are in the driving seat of dispute settlement. Instead, Japan has pursued what might be called "tactical legalization", borrowing expertise, information and leverage from the private sector, foreign lawyers and the other major trading partners such as the EU in particular. The book demonstrates in detail how the multilateral trade system and the trade policy of major trading nations, including

that of Japan, interact to increase or restrain the "legalization" of the world trading system.
