Essentials of Pharmacology for Health Occupations Elsevier Health Sciences

This ideal starter text for student nurses in pharmacology is now into its 4th edition. It makes pharmacology less intimidating by focusing on the knowledge needed at pre-registration level in order to safely and competently practice as a newly qualified nurse. Praised for its helpful layout and jargon-free language, this updated edition introduces pharmacology in a friendly, informative way, without assuming previous knowledge or a level of confidence in numeracy. This new edition has been carefully expanded to include new chapters on cardiovascular pharmacology and chemotherapy in cancer nursing. There are more details on drugs used in chronic and long-term conditions applied to nursing competencies and standards. It incorporates the new 2018 NMC standards for nursing education and links to practice guidelines. Additional case scenarios have been added spanning all areas of practice and include adult, elderly care, child, mental health and learning disability applications. This allows nurses to apply their knowledge to a range of different people with varying and complex needs to enhance their application to practice. The book contains:

- 120 calculations and 130 multiple choice questions to assist you in assessing your learning as you work through each chapter
- Clinical tips boxes linking pharmacology to nursing practice
- 50 person centred case scenarios across a range of practice settings
- References to key standards and guidelines

"The book also emphasises the application of the principles of pharmacology to all areas of practice and includes; drug action, drug interactions, side effects and adverse reactions. It is useful for all pre-registration students and those on post qualifying or continuing professional development courses where pharmacology is a component. Overall, this book is an excellent resource for healthcare students that will support their learning throughout their training and beyond. It covers fundamental concepts of how the major classes of medications exert their therapeutic effect, but also how side effects and adverse reactions can occur. Chapters on legal aspects of medication administration and drug calculations enhance this usefulness of this book – all of which are supported by example questions, calculations and clinical 'tips'. This book has been fully updated to reflect the 2018 NMC standards and as such provides a one-stop shop for any students studying safe administration of medications." Dr Andy Powell, Physiology Lead for Nursing Birmingham City University "The outlay of the chapters is easily navigated and the level of the knowledge that the book starts at is at a basic level enough for any student nurse from year 1-3 to start with and builds in complexity. They are in lovely bite-size chunks that are easy to read and easily understood. The 10 MCQ's at the end of a chapter are a very useful method of chapter consolidation and the case studies further reinforce learning." Georgina Cox, Senior Lecturer in Adult

Health Middlesex University Deborah Robertson is a lecturer in nursing at the University of Salford. She teaches on the pre-registration nursing curriculum as well as being involved in post qualifying and post graduate education. She is also author of *Essentials of Medicines Management for Mental Health Nurses*. Paul Barber was a Senior Lecturer at the University of Chester. He is co-author of *Further Essentials of Pharmacology for Nurses* (2012) and contributor and editor of *Medicines Management for Nurses: Case Book* (2013), all Open University Press. He is now retired.

Essentials of Clinical Pharmacology in Nursing Elsevier Health Sciences

Essentials of Pharmacology for Health Occupations, 6th Edition provides an extensive framework of drug information in a concise format for learners studying licensed practical nursing, medical assisting and other allied health professions. Learn calculations quickly through a simplified step-by-step process. The accompanying CD-ROM helps learners master pharmacology through quizzes, games, and case studies with immediate feedback and medication administration techniques and safety video clips. Open this resource now and see how easy learning pharmacology can be. [Further Essentials Of Pharmacology For Nurses](#) Springhouse Publishing Company

This ideal starter text for student nurses makes pharmacology less intimidating by focusing on the knowledge needed at pre-registration level in order to practice as a newly qualified nurse. Noted for its clear layout and jargon-free language, this updated edition introduces pharmacology in a friendly, informative way. The book does not assume previous knowledge of pharmacology, or a level of confidence with maths and drugs calculations. This new edition has been carefully expanded to include a new chapter introducing drug calculations and measurements as well as more detail on drugs used in chronic conditions, as well as more on pharmacology for the older patient and for other specific groups such as children, pregnant women or those with minor illness. More case scenarios have been added to encourage nurses to apply knowledge to a range of different people with a range of needs. The book contains: 90 calculations and 100 multiple choice questions to help perfect your skills and assess learning Clinical tip boxes linking pharmacology to the role of the nurse 35 patient scenarios across a range of clinical settings References to key clinical tests and the latest NICE guidelines The book emphasises application of pharmacological principles to all areas of practice including drug action, interaction and side effects, and is useful to all students of pharmacology whether as part of a 3 year course, post-qualifying course, top-up course or standalone module. "This latest edition of a key textbook on pharmacology for nurses has moved forward from previous

editions by becoming stronger by the inclusion of a greater scope of material so maintaining its place as an essential pharmacology book for current and forthcoming nursing students in all clinical practice fields to give them a strong evidence base for their studies and clinical practice. The addition of a chapter on drug calculations is an essential step forward in this edition for all students as this is a key component within all current nursing degree programmes. The continued use of case studies and clinical tips makes learning fun both as an individual but also in small learning groups of students. It follows a clear pathway for learning: it is easy to read, is clearly written and shows the importance of aspects of pharmacology within the work of a nurse." Keith Booles, Senior Nurse Lecturer/Module Leader, Faculty of Health Sciences, Staffordshire University, UK "With the ever evolving role of nursing it is essential, for safe practice, that all nurses have knowledge of pharmacology. This latest edition of essentials of pharmacology for nurses offers just that. This is a well presented book with logical, thought out chapters that enable the reader to learn at their own pace. Although aimed at undergraduate nurses, I feel that this is a good base to build on pharmacology knowledge, not only for undergraduate nurses but also trained nurses." Sharon Riverol NHS West Cheshire CCG, UK Jaypee Brothers, Medical Publishers Pvt. Limited

Essentials for Health Professionals ASHP

This new edition has been fully revised to bring pharmacologists and trainees fully up to date with the latest developments in the field of medical pharmacology. Beginning with an introduction to general pharmacological principles, the following sections discuss drugs for common and less common disorders found in different regions of the body. The seventh edition includes new drugs, as well as the latest therapeutic guidelines from authoritative sources such as the World Health Organisation (WHO) and the British National Formulary (BNF). Each topic includes key point summary boxes as well as illustrations, flowcharts and tables to enhance learning. A 'problem-directed study' question at the end of each chapter helps trainees test their knowledge. An extensive appendices section includes a list of essential medicines, drugs that should/shouldn't be prescribed in pregnancy and lactation, and suggestions for further reading. Key points Fully revised, new edition presenting latest developments in medical pharmacology Includes therapeutic guidelines from WHO and BNF Problem-directed study questions and key point summary boxes enhance learning Previous edition published in 2008

Essentials of Pharmacology for Health Occupations Cengage Learning

"The book is an easy to follow introductory text ... It uses uncomplicated language and case studies and questions that provide students with concrete examples, relating to real life situations, upon which they can develop their pharmacological knowledge and understanding. Clinical tips are clear and illustrate the key points that should be considered by the nurse in the real care giving environment, including acknowledgement of the increasing usage of complementary medicine." David Armstrong, Senior Lecturer, Northumbria University, UK "This new book explains specific common disease processes including anatomy and physiology as well as the medications/drugs which may be used... It will be essential reading for pre-registration nursing students who want to build on their existing knowledge."

Margaret Dilger, Lecturer, University of Salford, UK This user-friendly guide follows on from the bestselling book *Essentials of Pharmacology for Nurses*, and is written for pre-registration nursing students looking for an accessible guide to drug groups that goes beyond the essentials. It is simple and accessible and examines the next logical set of drug groups that nurses need to know. These include: Cardiovascular drugs Gastrointestinal drugs Drugs used in cancer Drugs used in nausea and vomiting Anaesthesia Fluids Topical medicines Written by authors with extensive academic and practice experience, this book will build on your existing knowledge of anatomy and physiology to help give a holistic understanding of body systems. It features: Multiple choice questions in every chapter and calculation tests Unique sections on 'Complementary Therapies and Pharmacology' and 'Medicines Used on the Skin' Clinical tip boxes linking pharmacology to the role of the nurse or midwife Patient scenarios from a range of different clinical settings *Human Diseases + Essentials of Pharmacology for Health Professions, 8th Ed.* + MindTap Basic Health Science, 2 Terms 12
