This IBM® Redbooks® publication provides advice and technical information about optimizing and tuning application code to run on systems that are based on the IBM POWER7® and POWER7+™ processors. This advice is drawn from application optimization efforts across many different types of code that runs under the IBM AIX® and Linux operating systems, focusing on the more pervasive performance opportunities that are identified, and how to capitalize on them. The technical information was developed by a set of domain experts at IBM. The focus of this book is to gather the right technical information, and lay out simple guidance for optimizing code performance on the IBM POWER7 and POWER7+ systems that run the AIX or Linux operating systems. This book contains a large amount of straightforward performance optimization that can be performed with minimal effort and without previous experience or in-depth knowledge. This optimization work can: Improve the performance of the application that is being optimized for the POWER7 system Carry over improvements to systems that are based on related processor chips Improve performance on other platforms The audience of this book is those personnel who are responsible for performing migration and implementation activities on IBM POWER7-based servers, which includes system administrators, system architects, network administrators, information architects, and database administrators

This engaging and clearly written textbook/reference provides a must-have introduction to the rapidly emerging interdisciplinary field of data science. It focuses on the principles fundamental to becoming a good data scientist and the key skills needed to build systems for collecting, analyzing, and interpreting data. The Data Science Design Manual is a source of practical insights that highlights what really matters in analyzing data, and provides an intuitive understanding of how these core concepts can be used. The book does not emphasize any particular programming language or suite of data-analysis tools, focusing instead on high-level discussion of important design principles. This easy-to-read text ideally serves the needs of undergraduate and early graduate students embarking on an "Introduction to Data Science" course. It reveals how this discipline sits at the intersection of statistics, computer science, and machine learning, with a distinct heft and character of its own. Practitioners in these and related fields will find this book perfect for self-study as well. Additional learning tools: Contains "War Stories," offering perspectives

on how data science applies in the real world Includes "Homework Problems," providing a wide range of exercises and projects for self-study Provides a complete set of lecture slides and online video lectures at www.data-manual.com Provides "Take-Home Lessons," emphasizing the big-picture concepts to learn from each chapter Recommends exciting "Kaggle Challenges" from the online platform Kaggle Highlights "False Starts," revealing the subtle reasons why certain approaches fail Offers examples taken from the data science television show "The Quant Shop" (www.quant-shop.com)

Making Global Value Chains Work for Development Routledge

Most people know that there are 70 million Baby Boomers in America today....but what is less known is that there are approximately 100 million people in America between the ages of 16 and 30. This generation has just entered, or will soon be entering the work force. And they have no idea how to invest, save, or handle their money. Young people today come out of school having had little or no formal education on the basics of money management. Many have large debts from student loans looming over their heads. And many feel confused and powerless when their pricey educations don't translate into high paying jobs. They feel that their \$30,000-\$40,000 salary is too meager to bother with investing, and they constantly fear that there will be "too much month left at the end of their money." Douglas R. Andrew has shown the parents of this generation a different pathway to financial freedom. Now Doug and his sons, Emron and Aaron - both of whom are in their mid-20s - show the under-30 crowd how they can break from traditional 401k investment plans and instead can find a better way by investing in real estate, budgeting effectively, avoiding unnecessary taxes and using life insurance to create tax-free income. With the principles outlined in Millionaire by Thirty, recent graduates will be earning enough interest on their savings to meet their basic living expenses by the time they're 30. And by the time they're 35, their investments will be earning more money than they are, guaranteeing them a happy, wealthy future.

Unceremoniously dumped in the orphanage by their drunken, war-traumatized father, Don and his brother Mike learn the harsh realities of life. We can feel the fear of the tormented child and smell the antiseptic dormitory. Not all is bad there, for it is during this time that the young Donald sees his true love, Annette, for the first time. Her brunette hair, twinkling eyes and heart-melting smile are what help sustain the warrior's sanity and focus during some of his darkest moments, which are yet to come. Don was a 'malcontent renegade' in the eyes of the nuns, because he fought for his dignity and that of his brother. Recalcitrant, yet gregarious, Don is dismissed from the orphanage with his brother, and returned to the father who had abandoned them. No hope for the future leads the seventeen-year-old boy, old beyond his years, to a recruiter's office and the Army. In August 1967, after a tour in Alaska and six months in Germany, the young paratrooper volunteers for duty in the Republic of Vietnam and is initially assigned to the 173d Airborne Brigade. Then, he hears a call for volunteers and joins a new long range patrol unit being formed, with the motto "I Serve," and the charter of taking the war to the enemy. Expertly weaving heart-thumping moments as enemy soldiers walk past within mere feet of patrols, the cacophony of battle and copper-taste of adrenaline during contacts, and the stark contrasts of the war, Don Hall takes us on his tour with the Lurps. We feel the anguish of losing teammates, and share the love for comrades. We see the oblivious eyes of the enemy walking toward an ambush, and the handmade wooden cross prepared by a soldier for a dead enemy tossed from a helicopter. We hear the cries of the wounded and the soft strains of songs on the radio. We feel the hurt and anger of the young boy, and the power and control of the soldier as he serves.
